

Online Backup

With an online backup, you are protecting your critical business data in case of disaster. This would not be a replacement of your existing backup, but a method of preparing for a disaster by augmenting your current backup process.

Nearly half of businesses that experience catastrophic data loss fail immediately. 93% of businesses that suffered a data loss of 10 days or more went bankrupt within a year after the incident.
-- National Archives and Records Administration in Washington

Why an Online Backup from Literati?

- Secure transmission and data storage of your data on a server on the Internet providing you remote access whenever data is needed.
- Backup monitored and confirmed working by Literati
- Support for desktop and laptop computers in addition to data stored on your network servers
- Online backup data storage needs can grow or shrink as your needs change
- Custom configured to meet your unique data needs.

Pricing

The online backup implemented for you is customized to meet your data storage needs. Plans start at 5 GB of data capacity and can be increased as necessary. Payment can be done monthly or yearly.
